# "Glue-N-Go" Manifolds

## BENEFITS OF USING MANIFOLDS

- Manifolds are pre-assembled requiring No Field Assembly
- Total control of each individual output
- High Flow Valve with low pressure loss = energy savings
- Easy replacement with Repair Coupling
- Reduced Labor Cost

## MANIFOLD FEATURES

- One complete manifold of 6, 4, 2 or 1 outlet
- Dedicated High Flow Ball Valve per outlet
- High Flow Ball Valves are field service-able
- Manifold Inlet is a 3/4" Socket / 1" Spigot
- Easy start-up flush without contamination
- Low Profile Installation
- Low Profile Handles
- Deep Socket Inlet Repair Coupler

## 6 Outlet with Optional Ball Valve for Flushing

# How to Order Riser Manifolds

These examples do not represent all possible combinations

## 1. Choose Item

Item Type	Page 6 Example	Part # Example
RV = Riser Valve	1, 2, 3, 5	<b>RV</b> 6656-C
RY = WYE Configuration	4	<b>RY</b> FHT-5
RSI = Side Inlet	5	<b>RSI</b> 48
RF = Straight Flushing Valve		<b>RF</b> 5

## 2. Choose Outlets

Outlet Type	Page 6 Example	Part # Example
T = Has 2 outlets	5	RV <b>IT</b> 5-MHT
4 = Has 4 outlets	2	RV <b>4</b> 78-C
6 = Has 6 outlets	1, 3	RV <b>6</b> 656-C

## 3. Choose Size Configuration

Size Configuration Type	Page 6 Example	Part # Example
656 = First 2 outlets are 600id, Second 2 outlets are 700id, and Third 2 outlets are 600id	1	RV6 <b>676</b> -C
686 = First 2 outlets are 600id, Second 2 outlets are 800id, and Third 2 outlets are 600id	3	RV6 <b>686</b> -V-1
78 = First 2 outlets are 700id and second 2 outlets are 800id.	2	RV4 <b>78</b> -C
7 = All 4 outlets are 700id		RV4 <b>7</b>
5 = Both outlets are 500id		RVT <b>5</b>

## 4. Choose End Item

End Item	Page 6 Example	Part # Example
C = Cap	1, 2, 5	RV6656- <b>C</b>
V = Flush Valve	3	RV6686- <b>V</b>
MHT = Male Hose Thread		RVTT5- <b>MHT</b>
FHT = Female Hose Thread		RVTT5- <b>FHT</b>

# PVC Ball Valves

1/2" to 2 - 1/2"

3" and 4"

## FEATURES

- PVC handle/lever
- Industrial Grade, Maintenance Free Design
- Fully ported opening
- One piece PVC molded body, Leak tested 100%
- Available with female NPT or slip / socket connections
- Applications include: Irrigation, Water Supply, Plumbing, Swimming Pool, Chemical Feed, Marine and Waste Water

## OPERATING SPECIFICATIONS

- Pressure Ratings:  
 1/2" - 2" Valves rated at 200 psi @ 70°F  
 2 1/2" - 4" Valves rated at 150 psi @ 70°F
- Temperature Operating range is from 41°F to 122°F
- EPDM seat and O-ring

# Automatic Irrigation Control

## Logic Plus S - 2 Wire Controller

### FEATURES

- 42 station capability / 128 station capability.
- 8 programs / 16 programs.
- 8 start times per program / 16 start times per program.
- Looping feature on program 6 and remote sensor relay to activate program 6.
- 1 minute to 10 hr 59 minutes run time per station (all programs except 5 and 6 which are 1 second to 59 minutes 59 seconds)
- Water budget 0-250% (5% increments) increasing run times per station to over 24 hours.
- Semi automatic and programmable manual operations.
- Programmable pause between stations per program 0-59 seconds.
- Programmable rain delay up to 31 days.
- Programmable master valve.
- Fertigation control relays with fertigation programming.
- Date/leap year sensitive scheduling options weekly, 1-28 day interval.
- odd /even calendar day capabilities.
- Programmable test cycle.
- “Bounce back” technology allows programs to immediately continue on schedule after power outage.
- Radio remote ready.
- Program start input.
- Clear function for each independent program or entire controller.
- Displays real time operation.
- Up to 4 valves may operate simultaneously, same or different valve numbers.
- 4 field wire outputs, wire run lengths up to 12,000 feet each in four different directions.
- Field wires may be installed with tee, crosses and star wire configurations.
- Each valve has dedicated unique programmable receiver.
- Receivers can be programmed at controller or by way of portable programming unit, Model #LP-HHRP.

PART #	DESCRIPTION	CASE QTY	LIST PRICE
LP42S-C	1-42 Station, 8 Program, 8 Starts per program, 4 path, two-wire output controller in stainless steel locking enclosure. Requires one “LP-RP” programmable receiver per valve.	1	\$2,290.36
LP128S-C	1-128 Station, 16 program, 16 Starts per program, 4 path two-wire output controller in stainless steel locking enclosure. Requires one “LP-RP” programmable receiver per valve.	1	\$3,316.35
LP-RP	Programmable Receiver for LogicPLUS Controllers and LP-UNI-2. Programming of receiver requires a LP-42, LP-128 Controller or LP-HHRP. The LP-UNI-2 utilizes the LP-RP receiver. Each case of 16 LP-RP contains one each #1-#128 receiver identification tag kits. Each LP-RP also includes a pair of DBC-BR brass, waterproof wire connectors for splice to two-wire path.	16	\$160.98
LP-SPD-F	Surge Protection Device for field wiring of two-wire path. To be installed approximately every 300 - 500 ft along two-wire path. Install with grounding rod (not included). Include DBC-BR Wire Connectors Kit.	1	\$87.15
LP-UNI-2	Universal 2 Plus, 1 to 40 Station Two-Wire System Converter with dual output in stainless steel enclosure (requires one receiver per valve-sold separately part no. LP-RP)	1	\$1,784.12
DBC-R/Y	1 Kit consists of 2 water proof, direct bury, gel-filled splice housings, 2 R/Y 3M wire nuts and 1 splice organizer in a bag.	100 kit	\$5.61
DBC-BR	Logic Receiver Waterproof brass splice kit with direct bury, gel-filled housing for Receiver to Two-wire path connection. Two connectors per kit includes splice organizer.	100 kit	\$11.62

# 500 Series Straight Flow Valves

## Available in 1", 1.5", 2" and 3"

### FEATURES

- Straight through flow path
- Extremely low pressure loss
- High gallon
- 200 PSI rating
- Stainless steel hardware
- 24 VAC solenoid
- 5 year warranty

### ELECTRICAL SPECIFICATIONS

- 24 VAC standard
- Inrush: 350 mA
- Holding: 250 mA
- Cycles: 50 Hz to 60 Hz

### OPERATING SPECIFICATIONS

- 1" Flow: 1 GPH - 50 GPM
- 1 1/2" Flow: 1 - 110 GPM
- 2" Flow: 2 - 250 GPM
- 3" Flow: 5 GPM - 250 GPM
- Operating pressure: 15 to 200 PSI
- Recommended velocity not to exceed 5 feet per second of corresponding pipe size
- All valves for outdoor and installation only

### OPTIONS AVAILABLE

- Pressure Regulation Device
- Normally Open Valves
- Normally Closed Valves

### 520-050

2" Nylon Female Thread inlet and outlet  
Flow Control  
Overall Height: 8"  
Overall Width: 5 - 3/4"  
Overall Length 8 - 1/4"

A straight flow valve has a patented open flow design. There are no 90 degree angles that the flow of water has to maneuver around. This allows for flow rates as far low as 1 GPH. The diaphragm inside does not cause hammering when closing like a typical diaphragm operated valve.

# Grooved Coupling

Grooved Fittings are a popular method of making pipe connections with larger diameter pipe in the Agricultural market. These fittings are compatible with grooved PVC pipe ranging in size from 2" through 12". Each cast iron fitting comes with a matching rubber seal and two brass bolts and nuts for a leak proof connection. Grooved fittings can be removed as needed and re-used with no gluing or cutting of pipe required.

## FEATURES

Grooved flexible couplings have a 300 psi rating

# Dual Stage Lake/Pump Filter

The RainPro Lake/Pump Filters are dual staged with both an outer and inner filter designed for use on the intake side of a pump that is typically drawing from a pond or lake. These Lake/Pump Filters are easily matched to the Flow requirements of any application with the unique 2" male spigot connections on each end for easy manifolding using standard 2" slip PVC fittings or Union connections. The PON-006, 6" diameter unit is designed for 0 to 40 gallon per minute flow and the PON-012, 12" diameter unit is designed for 0 to 80 gallons per minute flow. The size and quantity of filters required is dependent on desired flows. The RainPro Lake/Pump Filters are manufactured of Heavy Duty PVC top and bottoms with rigid molded PVC inner and outer filtration walls. The hardware is all Stainless Steel.

The PON-006 has a 6" outer molded filter screen with exactly 38.8 square inches of total open area and an inner 2" molded diameter filter screen with exactly 21.6 square inches of total open area. The PON-006 is rated for 0 to 40 GPM in clean water.

The PON-012 has a 12" outer molded filter screen with exactly 82.0 square inches of total open area and an inner 6" molded diameter filter screen with 38.8 square inches of total open area. The PON-012 is rated for 0 to 80 GPM in clean water.

With the relatively large surface intake area, the velocities remain low, minimizing the suction of unwanted debris from the surrounding area.

## Popular Configuration Of PON-012 Lake/Pump Filters

## OPERATING SPECIFICATIONS

- Each Pon-012 filter added to system equates to an additional 80 GPM capacity. Centerline pipe must be sized to maximum flow desired.
- All connections to filter use standard 2" slip PVC fittings, including; tees, ells, couplings, male or female threaded adapters, unions etc.
- This filter system provides you the most flexibility and cost effective means of assembling the filter design that meets your system requirements.
- Each filter includes 2" slip PVC Schedule 40 threaded female adapter and a 2" slip PVC Schedule 40 cap.

# Rainpro Hand Pump

The RainPro hand pump is a manually operated, rugged, self priming, debris tolerant pump that is manufactured to easily and quickly pump out water filled; valve boxes, broken pipe lines, sprinkler repair sites or anyplace you want to pump water away from. This hand pump will flow up to 13 GPM or ¼ gallon per stroke.

To use, simply insert the 1-½” pump intake on bottom of shaft into the water you want vacated and place the flexible outlet hose (6’ long) to the location you want the water to be pumped. The water can be muddy and laden with dirt and debris. Should pump get clogged, it can be easily disassembled, cleaned and back to use in a couple of minutes. Repair parts are available.

## FEATURES

- High Flow Capacity – 13 GPM, 4 strokes per gallon
- Self Priming Action
- Debris Tolerant
- Special reinforced shaft
- Intake grate filter designed to prevent internal clogging of any ingested debris
- Removable Intake Cap and Top Cap for easy cleaning
- Outlet Stake directs discharge where you want it to go
- Polyvinyl body and components eliminate Rust or Corrosion
- Made in the USA

## OPERATING SPECIFICATIONS

- Body has overall length of 39”, diameter of 1-1/2”
- Flexible outlet hose is 6’ long and will not crush

Rain Pro, a division of HIT Products Corporation, is a leader in the irrigation industry. Founded in 1982, HIT Products Corporation has created and manufactured numerous products that have proven beneficial for our customers. "Intelligent Irrigation Solutions" is our slogan that propelled Rain Pro into the new era of water efficiency and distribution. As a manufacturer, HIT is committed to providing our customers with time-tested products and newer, more efficient ones. In addition, HIT applies sustainability practices to our development so that you, the customer, know that our products will meet your standards. As a result, technologically advanced efficiencies have shown cost savings in installation and maintenance in irrigation systems. Thank you for your business and continued support! We look forward to working with you.

**Sales Policy** - RainPro Products are sold through recognized Professional Wholesale Irrigation Distributors only.

**Minimum Order** - \$250 net, case/bag quantities only. No broken case or bag quantities.

**Claim for Shortage** - All claims for shortage are to be made in writing to: RainPro, P.O. Box 929, 556 South Mirage Avenue Lindsay, CA. 93247 USA or FAX (559) 562-6626 within 15 days of receipt of goods.

**Returned Merchandise** - Restocking / Inspection Fee of 25% will be assessed. ## "Glue-N-Go" Manifolds

**Installation** - All manifolds are recommended to be installed at ground level. In addition, tubing attached to manifolds should never be anchored, thus allowing for expansion and contraction of the tubing without adding stress to the manifold.

**Warranty** - HIT Products will repair or replace, at their discretion, without charge, all parts which are found to have original defects within the warranty period, provided the product is returned at the customer's expense. From the initial sale date, the warranty period is two years. Warranty will be void on all parts if the tubing is anchored in the field, not to allow for shrinkage and expansion.
